

IWA COIN

# IWA COIN

*IWA HUBBING ALL YOUR ONLINE NEEDS*

# ABOUT IWA COIN

## IWA Coin

- With the current trend of social e-commerce becoming more famous worldwide, especially in Southeast Asia, buying, selling, and exchanging are getting more and more digitalized. Therefore, IWA Coin was created to serve as a medium of exchange for all online platforms such as Social E-Commerce, online games, or general stores.

- Accessibility and user-friendliness of IWA coin's development are the features that make it very easy to use, even for the users who do not know cryptocurrencies well. Tokens can be easily and swiftly purchased via the IWA application or general trading sites. IWA coins can also be mined by IWA WiFi Smart Nodes.
- The primary targets for IWA coins are general stores, small shops in cities with access to the internet, and online games and applications that give away rewards that are looking for an exchange medium for buying, selling, and rewarding the app users in a way that doesn't involve cash or time consuming and complex procedures at the bank.

# IWA COIN HISTORY

- Our IWA Coin developers initially began with the internet on TV Cable business. Then, after **one year**, we had developed the IPTV and VOIP system. And **two years** later, we offered the online mobile top-up service.
- In **2016**, we started to learn more about bitcoin mining and purchased numerous mining hardware from China to mine bitcoin. It was then that we have fallen in love with Cryptocurrency. From that moment on, we have been dedicating ourselves to researching and finding new Crypto mining techniques.
- In **2019**, we began selling online and promoting our businesses through every social platform.
- Then one day, we knew that the time has come and that we were ready. Thus, we have combined our experience in the last ten years to create the IWA Coin. This coin is a medium for buying, selling, and exchanging goods and currencies in online and offline environments worldwide. Moreover, we had invented a new token mining method using WiFi, which is easily accessible to the general public. This method has a low startup cost. It is also environmentally friendly, energy-efficient, and suitable for anyone interested in IWA Coin mining.

# IWA COIN HISTORY

- With our experience in online sales and business promotion via social media, we have studied and utilized the referral program as our marketing strategy. This method can help IWA Coin grow swiftly and sustainably, making them accessible for various users.
- Numerous problems during **our years** of journey in the Crypto world were certainly precious lessons that had taught us to solve any problems correctly and properly. This is an essential part that will make the IWA Coin stand high on the 1st rank in the Crypto world in the future.

***“Comprehensive planning, long-term visions, confidence in every step”***
